A01 - Charts

Create the Data Table

Start with the completed report from I04, Report 88006.

1. In the ForNAV designer open the properties of the Line Data Item and drill down into the Data Table property;
2. Click Add, drill down into the source expression and add this line:

```
'No: ' + Line.LineNo;
```

3. Set the Name property to No;
4. Click add, drill down into the source expression and select Line.Amount;
5. Click add, drill down into the source expression and add this line:

```
Line.Amount * Line.LineDiscountPct /100
```

6. Set the Name property to Discount;

Create the Chart

7. Right click the Line Data Item and select Insert Section > Footer;
8. Set the Section Name property to Chart;
9. Drag a Chart Control into the new Chart Section, in the wizard choose Bar Stacked and click Finish;
10. Open the properties of the chart. In Data Member select Line;
11. In the Series Data Member select No;
12. Drill down in the series property and open the Properties tab for Series 1;
13. Expand the Value Data Members property and select Amount in the Value property;
14. Set the Value property of Series 2 to Discount;
